

Trapezoidal Style TZ Packings

Key Features:

- Quicker Break-In
- Lower Leakage
- Reduced Shaft Wear
- Lower Energy Usage

Key Benefits:

- Reduced downtime due to less adjustment
- Reduces costly equipment wear
- Longer service life

In response to current industry trends, American Braiding now offers a variety of styles in our new -TZ style Trapezoidal pattern braid. This trapezoidally shaped braid allows our packing to better conform to the pump shaft, more evenly displacing the load across the surface, allowing for lower leakage rates and reducing the amount of energy required to operate. -TZ style packings are available in most of our styles, the most popular are listed below. Solid or hollow resilient rubber core packings are also available.

Style TZ packings are available in the the following styles and sizes

Style 8100BIL	5/16" - 1"	Style 8100BILK	5/16" - 1"
Style 8000T (GFO)	5/16" - 1"	Style 8000TK	5/16" - 1"
Style 300	5/16" - 1"	Style 310	5/16" - 1"
