Style Number: 359
Service: Tanklid Packing
Product Type : Braided Packing

Description:

Braided from PTFE over a filler material and rubber core, Style 359 was specifically designed to seal tank covers, hatches, and lids where the stored media is highly aggressive. Thoroughly designed and tested, Style 359 combines the chemical resistance and sealability PTFE, with the compression recovery properties of braided packing.

Construction:	Round Braid
Temperature Rating:	500° F / 260°C
pH Rating:	0 – 14
Shaft Speed Rating:	N/A
Pressure Rating:	N/A
