Style Number: 8100BIL
Service: Pump and Valve Packing
Product Type : Braided Packing

Description:

Braided from filament yarn made from high quality graphite and PTFE, Style 8100BIL is easy to cut and install, yet more extrusion resistant than other graphite/PTFE packings. Our proprietary high-speed lubricant is added for quick break-in and low friction during operation. Designed use in valves, centrifugal pumps, high-speed rotary and reciprocating pumps, 8100BIL combines the heat dissipation properties of graphite, with the chemical resistance of PTFE.

Construction:	Interlock Braid
Temperature Rating:	-350°F/-212°C to 550°F/275°C
pH Rating:	0 - 14
Shaft Speed Rating:	2000 FPM / 10 MPS
Pressure Rating:	300 PSI / 20 BAR
