Fax 732-938-6377

Style Number: 9000
Service: Valve Packing
Product Type : Preformed Packing Rings

Description:

Nuclear grade grafoil tape is wound then die formed into a preformed grafoil ring. Available in solid rings or 45 degree split with or without corrosion inhibitor. Our preforming process compresses each ring to a uniform density, evenly distributing the sealing load throughout the packing set. ABM style 9000 grafoil rings are the ideal sealing solution for your high temperature or pressure applications. Rings may be purchased individually or in sets, and can be used with braided Style 8000 end rings for superior extrusion resistance and sealability.

Construction:	Preformed Nuclear Grade Grafoil
Temperature Rating:	850° F 455° C Air 1200 °F 649 °C Steam 6000 °F 3315 °C Non-Oxidizing Atmosphere
pH Rating:	0 – 14 Except Strong Oxidizers
Shaft Speed Rating:	N/A
Pressure Rating:	10,000 PSI / 680 BAR
